

Hi! My name's Kai and I want to be YOUR disabilities officer.

As a person with Autism, who also struggles with mental and physical illness I want to be a voice for all disabled students, and bring those like me with invisible disabilities into the light. I want to be more involved in decisions and campaigns regarding our disabled community here at YSU.

I have been on the committee of a society for nearly two years, filling both the social and vice chair roles, meaning I already have a rapport with various staff and student members of the SU. I have spent a year discussing accessibility with various venues around York, making sure the members of my society could all come to events, both through physical access and also things such as sound level, private rooms, and staff who are aware of all our needs. This all means I am more than comfortable asking for what I, and those I represent, need.

I have never been afraid to voice my opinion, and now I want to use this opportunity to voice yours.

# Kai Aspinall
