

Being part of the YSJ community I have seen how students dedicate their free time to improving and positively changing the student life at university, how they offer support and encourage change! I want to be part of this and help impact student life for students in my School. I intend to continue the mental health work that the previous Chair of School has put in place, I want to introduce support for students studying abroad whether it is students studying abroad for a year or semester and helping them transition back into life at York or students who are coming to York to study. I also intend to help students with the transition from three schools to one school by holding drop in's for not just reps but also students throughout the school making sure they know who I am and how they can access either support from myself or student services.

Millie Whiteford

Chair of Education, Language & Psychology
